

M953UL III

Wireless Laser Notebook Mouse

M953UL III is a high quality wireless mouse with streamlined design and sparkling colors. It is equipped with the latest enhanced 2.4GHz wireless transmission technology, multiple power saving modes and it's design allows the user to conveniently store the dongle receiver inside the mouse.

M953UL III allows interference-free operation in a wide range of up to 10 meters, thus providing maximum freedom. At the same time the high precision 1600dpi laser sensor ensures the cursor tracking fast and precisely.

M953UL III contains multiple power saving modes to conserve power and extend battery life. Store the dongle receiver into the housing of the mouse and thus switch off the device if the mouse not used for a certain period of time . There is also a conveniently located On/Off switch on the mouse bottom for this purpose.

Feature

- 2.4GHz wireless transmission technology allows interference-free operation in a wide range of up to 10 meters, thus providing maximum freedom.
- 1600 dpi Laser sensor provides cursor control with ultra-precise tracking.
- Smart mechanical design to allow the user to conveniently store the dongle receiver inside the mouse.
- Has multiple power saving modes to conserve power and extend battery life.
 - Mouse turns off automatically when the receiver is stored inside the mouse.
 - On / Off switch to maximizes battery life.
 - Low battery indicator blinks to remind you to change the battery.
- Compact size makes it easy to carry and comfortable to use.

Specifications
